

Todd Shea Town Manager 2011-2015

Four years ago this coming June, a young individual, with a big smile on his face, entered Town Hall to assume the responsibilities of Arundel Town Manager. He had big shoes to fill as the previous Manager had been there for a long time and knew the town like the back of his hand. This young lads name was Todd Shea and he was determined to make Arundel one of the best places around to live in.

With Todd's help, the town moved forward with the adoption of two TIF (Tax Increment Finance) Districts that should help stabilize the tax base for future capital projects. He also helped to develop the Economic Development Committee and their work with the Chesapeake Group Branding Study.

After four years, he has certainly set the bar high. His openness and approachability has been one of his best traits and he has kept our taxes relatively flat while still adding money into our capital projects funds. In 2014, Down East Magazine named the Town of Arundel as one of the six best places to live in Maine. I believe that the determination and leadership at Town Hall helped us earn that recognition.

In January of this year, Todd was given an opportunity that he could not pass up and accepted a position as General Manager of Kennebunk Light and Power District.

We would like to take this opportunity to thank Todd for his effort and time here as our Town Manager. It certainly has been a pleasure working with him and we wish him the best in his new position.

Dan Dubois
